- 42" tall
- Galvanized
- Hardware included
- Easy to level leveling plate
- Molded spacers shaped to fit 5" design posts

## 6" Single Plate Post Mount

**89061**

- 42" tall
- Galvanized
- Hardware included
- Easy to level leveling plate
- Molded spacers shaped to fit 6" design posts

## Manufacturing Quality Products in a Picturesque Village

Welcome to our charming village of Bird-in-Hand, Pennsylvania. Ever since the Quakers, Mennonites, and Amish settled this land in colonial times, our community has been alive with trades and crafts as well as farming.

Stagecoaches and freight wagons stopped for the night in our village as they rumbled along the Old Philadelphia Pike on their way from Philadelphia to Lancaster. Local inns and other places of commerce sprang up to service these freight haulers who were helping to build a new country.

Today along the tree-lined village street called Maple Avenue, our Stoltzfus family is practicing the trade of manufacturing metal

gate hardware for use with vinyl fencing. We carry on the fine tradition of quality craftsmanship for which our Lancaster County community is well known.

Along with the other businesses in our village, we desire to provide our industry with the best products possible at the fairest price. That is the way we do business in Bird-in-Hand.

We are blessed to be a part of this community where integrity and honesty are a part of daily commerce. Our hinges and latches are truly Lancaster County-made!

## Hardware Numbering System

8 = Post Mount  
9 = Gate Hardware

**9 0 1 0 3**

Color:  
0 = Black  
1 = White  
9 = Galvanized

1 = Hinge
