

ScreenRail
Designed to Keep You Outdoors

CLEAN: City water rinse CLEANER: Recycling reverse osmosis water rinse CLEANTEST: Pure reverse osmosis water rinse SEALER: Dried-in-place aluminum sealer

A 200 MPH air blast removes water drops from the pre-treated aluminum. A convection oven completes the dry-off process.

Powder is applied with 18 automated and 2 manual spray guns. Compressed process air is dried to -35°F Dew Point for superior adhesion.

The powder coating is then bonded and adhered to the aluminum sub-straight in a 400 degree cure stage.

The powder coating application booth produces zero VOC emissions. Powder is stored and applied in a climate controlled positive pressure environmental room. Ten pre-treat system titration checks twice per shift maintain system parameters and ten QC checks are completed every hour on product coming off the powder-coating line. Parts are not touched by human hands during the pre-treat, dry-off, application and cure process to maintain ultimate cleanliness of powder-coated parts.

DSI is a PCI 4000 certified and verified AAMA 2604 and AAMA 2605 compliant powder coating applicator. The powder coating process is accredited by the American Architectural Manufacturing Association and the Powder Coating Institute. Our powder coating is custom blended from a Super Durable Polyester TGIC (Triglycidyl Isocyanurate) resin-base, using premium pigmentation to meet AAMA 2604 specifications. Our AAMA 2605 is a fluorocarbon polymer resin system.

ScreenRail

Expand your living area by bringing the outdoors inside. ScreenRail allows you to enjoy the outdoors without the insects. Featuring the option of either a structural balcony/railing system or heavy-duty kick panel system, easy to assemble sections, assembled universal door (right or left hand hinge) with heavy-duty frame, and durable flat spline to secure screen. With a Lifetime Limited Warranty and a virtually maintenance-free product, Screen Rail is a premium system designed to keep you outdoors without being "bugged" by insects.

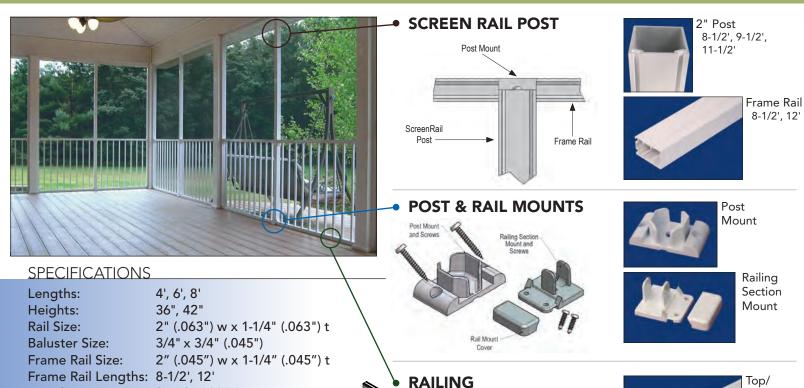

FEATURES

- Structural balcony and railing system
- Available heavy duty kick panel helps protect screen damage from feet and pets
- Easy to assemble 4', 6' and 8' sections
- Assembled universal door (right or left hand hinge) with heavy duty frame
- Certified PCI 4000 A-2 (AAMA 2604) compliant powder coating
- Durable flat spline secures screen
- Different size screen material* keeps gnats, black flies, and mosquitoes out
